

The quickest & easiest way to create expense reports

Building Supplies: Easy-to-use expense reporting with professional, detailed and straight-forward reporting

Companies in building supplies, construction, property management, facility management and similar industries frequently have to deal with purchasing supplies, tools, or equipment rentals. Workers need to accurately track these expenses against jobs, projects or work orders, and companies need to invoice their customers in a timely manner to ensure a sustained cashflow to operate. However, workers are often busy with the actual job, and may not have the time or attention to complete the necessary paperwork.

With **ABUKAI Expenses** reduces the paperwork to an absolute minimum. A worker in the field simply snaps a photo of a receipt or invoice, and ABUKAI's industry-leading, patented receipt recognition technology assembles the whole expense report automatically and passes it on to a finance, accounting or other management members - without the field worker having to waste precious time keying in information or learning complex tools. ABUKAI can also serve up a menu of work orders or other IDs to select from if needed. Further, ABUKAI can automatically reconcile purchase card data or centrally-billed vendor invoices with the incoming receipts to audit the validity of expense receipts, and ensure SOX compliance and client requirements. ABUKAI integrates with ERP or accounting systems and offers integrations with all major property and building management systems. Approval rules and policies can also be enabled if required.

Case Example: W.R. (Bill) Glasscock entered the lumber business immediately upon leaving the armed services after WWII, in 1946. Serving in various capacities, he worked himself up through the ranks of a small regional line-yard company, Leidigh and Havens Lumber Co. By 1967, the Leidigh and Havens Lumber Co. had become part of a much larger national building materials company and the Glasscock family had the opportunity to purchase the Manhattan location. They renamed their new company to Kansas Lumber Homestore, which was wholly owned by members of the family, just as it remains today. Kent Glasscock is the current President of Kansas Lumber Homestore.

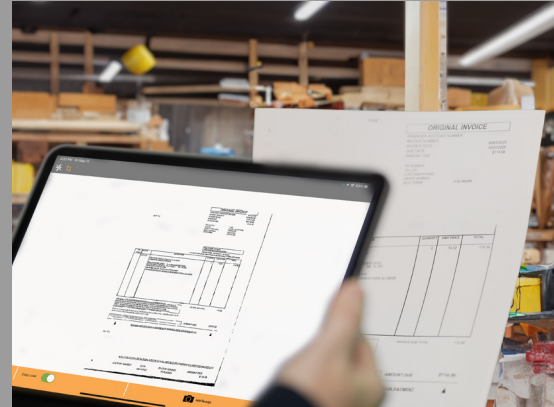

"It was a great day when I discovered ABUKAI.

The mobile app is easy to use, and I now use ABUKAI for university and our family business expenses. The reports are quickly received and are professional, detailed, and straightforward.

It truly doesn't get any better than that. Thank you, Abukai!"

Kent Glasscock, President
Kansas Lumber Homestore
