

The quickest & easiest way to create expense reports

Construction: Simplify expense management across projects, and automate your processes with ABUKAI.

Construction projects often involve numerous interconnected tasks. Costs include materials, labor, equipment, permits, subcontractors, and more. Tracking expenses, receipts and invoices for each job is crucial. However, the level of computer proficiency among construction workers can vary widely, and an easy-to-use solution is critical for workers to easily track expenses.

ABUKAI Expenses offers the industry's fewest clicks solution to creating expense reports. A worker or foreman can simply snap photos of receipts or invoices. ABUKAI's industry-leading, patented receipt recognition technology then assembles the whole expense report - without the worker having to waste precious time keying in information. Users can easily assign jobs to expenses, and ABUKAI then delivers a structured expense report fully with expense categorization. Electronic invoices can also be automatically forwarded to an employee's designated expensereport email address for processing. ABUKAI can distinguish reimbursable from purchase card expenses, and automatically reconcile card statements with the receipts.

Once ABUKAI processed the data, ABUKAI's Corporate and User Portals allow reviewing expenses across jobs, creating summary reports and reviewing statistics by job. If needed, ABUKAI can also integrate with existing ERP or accounting systems for record keeping, as well as job or project tracking software. ABUKAI also offers workflow solutions such as approval rules and policies as companies scale.

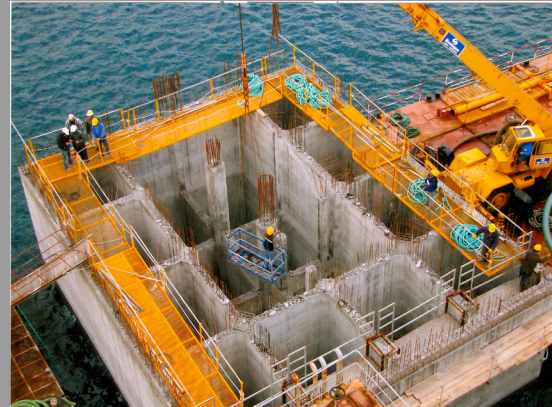

Case Example: NUSA Renova e Constrói is a construction firm, based in Portugal. NUSA undertakes a variety of projects for a wide range of clients – from small residential buildings to large commercial projects. Projects include high rise residential buildings, commercial buildings, heritage structures etc. NUSA focused on rehabilitation of damaged structures i.e. structural strengthening and waterproofing works. NUSA's unique and flexible project management systems ensure positive outcomes regardless of the size or nature of the project.

"ABUKAI is a powerful tool designed to simplify expense management, making it especially valuable in industries like construction, where tracking costs is critical. Managing project expenses often involves handling numerous receipts and invoices, which can be time-consuming and error-prone. ABUKAI eliminates this hassle by automating the process, allowing users to capture expenses with just a few clicks and generate reports in a fraction of the time."

... By reducing paperwork and streamlining expense tracking, ABUKAI enables businesses to focus more on their operations and less on administrative tasks, ultimately improving productivity and cost management. Whether you're managing construction projects or day-to-day business expenses, ABUKAI provides a reliable and user-friendly solution."
