

The quickest & easiest way to create expense reports

Consulting: Simplified life and money saved with ABUKAI Expenses! Industry's fewest steps to an expense report.

Many consultants are frequently travelling and incurring expenses. To stay focused on clients and projects, paperwork cannot get in the way.

ABUKAI Expenses offers the industry's fewest clicks solution to creating expense reports. A consultant simply snaps a photo of a receipt and ABUKAI's industry-leading and patented receipt recognition technology assembles the whole expense report for the consultant - without the consultant having to waste precious time keying in information. ABUKAI automatically converts foreign currency expenses to the selected home currency, and delivers a structured expense report fully with expense categorization and itemizations where needed (such as for hotel receipts). Electronic receipts can be forwarded to a consultant's designated expensereport email address.

If needed, ABUKAI can integrate with existing ERP or accounting systems to upload the expenses for reimbursement or corporate cards. ABUKAI also offers workflow solutions such as approval rules and policies as a consulting firm scales. Expenses can be assigned to projects, and ABUKAI can distinguish reimbursable from corporate card expenses, and automatically reconcile card statements with the receipts.
